Simon & Associates provides consulting on sustainable and healthy building practices for design firms, as well as public, private, and non-profit building owners and developers. The firm offers a wide range of services, including strategic planning, workshop facilitation, design consultation, LEED project management, specifications review and materials research, guidelines and educational resource development, and presentations and trainings. The firm has worked on more than a dozen LEED registered projects, and four of its LEED projects have been completed and have achieved certification.
